Professional Summary

Frontend developer building modern, responsive web applications with React, Next.js, TypeScript and Tailwind CSS. Currently a Junior Developer at Quark.i, creating AI-powered automation with Google Apps Script and the Gemini API. Background in Python automation, data analysis and networking fundamentals through Cisco certifications.

Technical Skills

Languages	Python, JavaScript, TypeScript, C#, Java, C++
Frontend	React, Next.js, Tailwind CSS, HTML5, CSS3, Responsive Design
Backend & Data	Express.js, Flask, REST APIs, SQL (PostgreSQL, MySQL)
Automation	Google Apps Script, Gemini API, Power Automate, Power BI, Excel
Tools & Methods	Git, Linux, Scrum, Vitest, Vercel
Networking	TCP/IP, IP addressing, routing fundamentals

Professional Experience

Junior Developer Jul 2026 – Present
[Quark.i](#) by [Legalnova](#)

- Built and maintain Google Apps Script market-intelligence agents that research four business areas and consolidate findings into a weekly strategic briefing.
- Integrated the Gemini API into the agent pipeline to automate research analysis and generate structured reports without manual intervention.
- Designed the end-to-end workflow, from research retrieval and Drive storage to automated Google Docs reports, speeding up deliverables.
- Developed internal automations with Power Automate and JavaScript to streamline recurring business processes.

Marketing Data Analyst Intern Sep 2024 – Sep 2025
[Colombia ESL](#) / [Open English](#)

- Automated repetitive reporting and data-processing tasks with Python scripts, reducing manual workload for the marketing team.
- Analyzed digital campaign KPIs (ROI, engagement, conversion) to identify optimization opportunities and support decisions.
- Built and maintained Excel reports to track advertising investment, campaign results and performance trends.
- Worked with internal teams and media partners to streamline reporting workflows and share actionable insights.

Projects

quick-dash Next.js, TypeScript, DuckDB, ECharts
Turns CSV files into useful dashboards in under two minutes, processing the data locally in the browser.

Split-it + Expense Tracker API React, Tailwind CSS, Node.js, Express, PostgreSQL
Full-stack expense splitting: JWT authentication, real-time balances, friend requests and debt settlement.

Ayame Discord Bot Node.js, discord.js, Electron
Plays YouTube music with per-server queues and posts free games and deals from Epic Games and Steam; Electron launcher.

Education

Software Engineering Mar 2026 – Present
Politécnico Grancolombiano

Technology in Software Development Aug 2023 – Mar 2026
Universidad ECCI

Certifications

- Python Institute:** PCEP – Certified Entry-Level Python Programmer, PCAP – Certified Associate Python Programmer (Dec 2025)
- Cisco Networking Academy:** CCNA: Introduction to Networks (Nov 2025), Networking Basics (May 2025), Python Essentials 1 & 2
- CertiProf:** Scrum Foundation Professional Certificate – SFPC (Aug 2024)
